

# UPDATING YOUR OPERATING SYSTEMS

BIG SECURITY FOR SMALL BUSINESSES

## THE OPERATING SYSTEM IS YOUR FOUNDATIONAL DEFENDER

### Make sure your devices are automatically updating

The operating system of your device (Windows, Mac OS, Linux, Android, iOS) comes with a suite of tools and security features that will protect your device from being compromised. These threats are always changing, so it's important to make sure that your devices are automatically updating and applying the latest software patches to keep your data safe.

UPDATE ...

### Automatically update Windows Devices

Windows 10 comes with an automatic update feature that includes security updates.

Enable automatic updates on your Windows 10 device:  
<https://support.microsoft.com/en-us/help/17154/windows-10-keep-your-pc-up-to-date>

### Automatically update Apple Devices

Enable automatic updates on your iPhone or iPad:  
<https://support.apple.com/en-us/HT202180>

Enable automatic updates on your Apple computer:  
<https://support.apple.com/en-us/HT201541>

### Automatically update Android Devices

If you don't have an Apple phone, odds are pretty good you're running Android.

Enable automatic updates on an Android device:
